Raise a family as one of your favorite wildlife and explore a huge 3D world. Join your friends to fight more enemies, or take them on alone to make your adventure more challenging in Wildcraft! today to start a life as an animal! Action RPG Matt November 12, 2015 JuiceBox Games is one of many mobile game specialists whose titles are largely centered on role-playing games, and the latest title, StormBorn: War of Legends, is certainly a MMORPG. You will get to lead an army of heroes and unleash epic fighting skills in this free mobile game, where can assemble a team made up of powerful heroes (over 60 to choose from), each of which could have different classes. The game promises a combination of visceral RPG action and deep strategy, and there is also basic construction and defense mechanics, as well as the ability for you to take on other players – as this is a new game that is far from being as established as Clash of Clans, we can't really vouch for JuiceBox when you argue that you can fight millions of other players around the world. Still, you get the idea. The real fun of StormBorn starts when you take on other players from around the world. And our list of StormBorn: War of Legends cheats, tips and strategies can be just what you need to beat them all, or at least beat most of them. 1. Make Your Heroes Better This tip is probably as good as given, but when playing StormBorn, you need to focus on making your heroes as powerful as possible. And that includes leveling them regularly with the Archon coin. You can earn this coin by completing quests, or by building Archon Wells. When it comes to spending this money, spend it on training so that your heroes can level up; this is a surprisingly affordable investment, and makes your heroes substantially stronger. Generally speaking, you want your heroes to be leveled to the maximum level of the house to which they are aligned. Your heroes would also benefit if you can improve their skills. This costs gold, which is harder to earn than the Archon coin, but if you've got enough gold coins in your chests, you can spend it on the accessory, which is completely worth it if you get to do it on top heroes. 2. To get better leveling equipment or strengthening your heroes is just part of what it takes to beat more human players in StormBorn. You also need to get better equipment and equip them on your heroes. This equipment can be found by completing quests, and in terms of allocating items to your heroes going, it is imperative to equip your best heroes with the best weapons and armor. Spreading wealth in this area might sound like a cool thing to do, but it won't really benefit much in the long run. 3. Choose the right battles in MMORPGs, a very important rule to follow is to choose a fight you know you can win. You can preview your opponents before you face them, so make sure you choose an opponent you outnumber or an opponent that is no longer active. 4. You don't control your heroes much in battle One thing to remember in this game is that your heroes are essentially left to their own devices when in battle. The only thing you control in your heroes is when they special skills. Keeping that in mind, you can string together combos the ability to use them simultaneously, thus giving you a big increase in the damage you cause. However, it is also smart to go for a fast explosion a capability if you are cornered and have no choice but to attack. Year-end deals now!!! Drive your ARMY OF EROI and epic epic unleashes Skills in StormBorn: War of Legends! FREE JOACA in actionrevolution + rpg strategy.
